

24 PLUS

24 PLUS

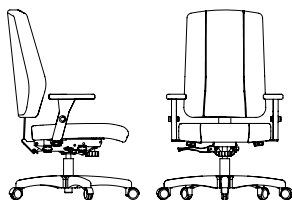

The 24/7 & Plus collection takes comfort to the next level. Available in two categories to support varying weights, with one that can support up to 350 lbs, these solidly built chairs are mindfully designed to make those heavy-duty, 24-hour + work shifts extra comfortable. These ergonomic chairs are great for intensive and uninterrupted seating periods. They also feature various customization options, which include upholstered or channeled seating, and a backrest that is available in two heights and widths to support every body type and curve. The 24/7 & Plus collection is refined and versatile in character, and so elegantly discreet that it blends right in with the other 24/7 & Plus collections.
