

LINK

LINK

Sculptural and modernist, the Link collection brings style to stackable plastic chairs. With a strong T-shaped form and angled back rest, Link chairs provide comfortable seating in waiting rooms, classrooms, training rooms and guest areas. Available in a black or white molded plastic color, you can choose to go with or without armrests, add optional casters, and choose from three different heights. The chair can even be mounted onto a black, white or platinum metal frame. With its versatility, our Link collection serves every workplace need.
