VIBE

Sleek, simple and supremely minimalist, our Vibe collection is known for its thin profile and light European touch. Discreet in nature, the contemporary lines featured on these chairs will enhance any space. Angled and curved for undisputable comfort, these durable, high-density plastic stack chairs are built to support those lunchroom discussions, reading nooks, or conference room gatherings. Available in four colors: red, gray, black and white, you can also choose from the chrome-finished sled bases for regular or counter-level heights. Products from the Vibe collection are also available in upholstered variations.
