AGORA TABLE SYSTEM

Designed with the collaborative space in mind AGORA tables consist of an extruded aluminium chassis along the perimeter of the surface and several leg configurations.

Standard table heights are 29", 36" and 42"

The key to the unique framework design is to enable thin surfaces providing a slim and elegant look also reducing wood consumption by 50%.

All components are mechanically assembled as a kit of parts and can be cut to a new size in the field which offers a unique advantage for future adaptability.

AGORA provides options for multimedia and conferencing applications in many choices of leg configurations to meet various size requirements in an integrated design approach.

MEDIA TECHNOLOGY

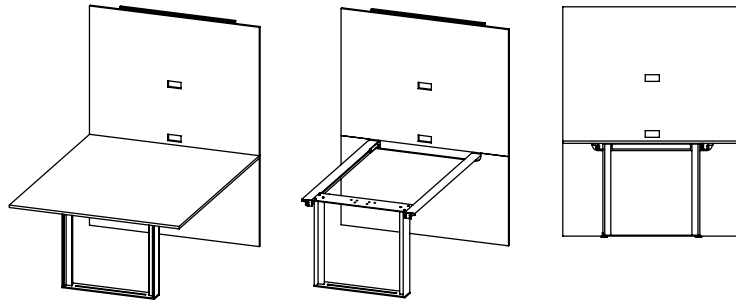

MEDIA FIT

With this smart and sleek configuration, the laminate vertical tech wall attaches to a table that can be rectangular, bullet, or trapezoid in shape. Table and screen-supporting walls are available in various heights. The wall is finished on both sides, so it can be free-standing in open office spaces. When floor layouts alter, the adaptable Media Fit is easy to move and eliminates the necessity of attaching the monitor to a fixed wall.
